

THE CLEANEST TOOLS GENERAL CATALOGUE EVER.

A leading player
in the professional cleaning market.

#01

#1 ITALIAN MANUFACTURER

IPC is Italy's #1 manufacturer of equipment for professional cleaning, ranking third in the professional cleaning market in Europe.

#02

WIDE PORTFOLIO

IPC provides a complete range of professional equipment including mops and frames, professional trolleys, window cleaning equipment.

#03

GLOBAL DISTRIBUTION

Distributed in over 120 countries. Nine owned international subsidiaries, focused on sales and aftersales.

#04

ENVIRONMENTALLY FRIENDLY

The group, focused on sustainable technologies, has developed a product line which uses recycled plastic thus preserving the environment and its unique and precious resources.

Designates for areas dedicated to catering

MOPS AND FRAMES RANGE

IPC frames combine ergonomics, productivity and efficiency. Specific frames for all needs: velcro, flap or pocket types.

Made to reach even the most difficult points.

- RESISTANT
- LIGHTWEIGHT
- ERGONOMIC
- EASY TO USE
- 100% RECYCLABLE

THE MOST COMPLETE RANGE OF FRAMES IN THE MARKET.

Sweeping operation is performed to remove dirt that does not adhere to the floor,

**MINIMIZING
THE SPREAD OF DUST
IN THE AIR.**

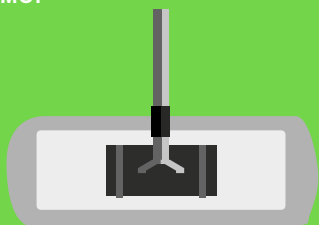

The activity can be distinguished between:

DRY or **WET SWEEPING**

#01

**FRAME
+
COTTON / ACRYLIC
MOP**

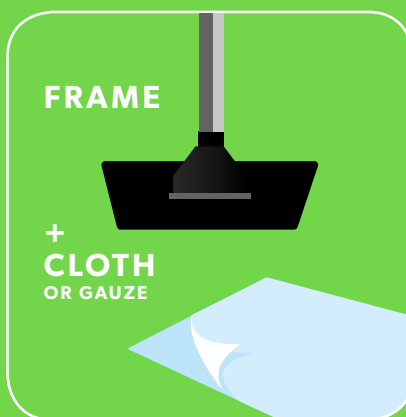

FOR DRY SWEEPING

cotton or acrylic dust mops replacements of various sizes are used with suitable articulated frames.

#02

FRAME

**+
CLOTH
OR GAUZE**

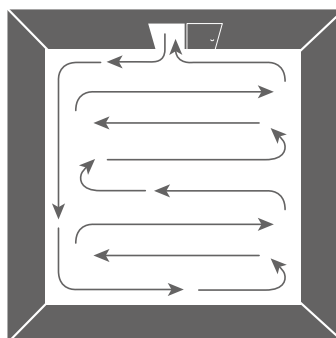

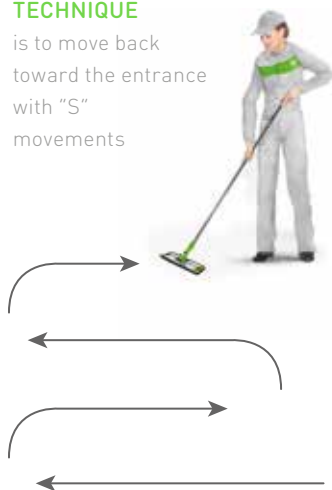

FOR WET SWEEPING

a frame, usually trapezoidal, is used with disposables impregnated (by mineral oils) cloth or with a cotton gauze.

THE RECOMMENDED TECHNIQUE

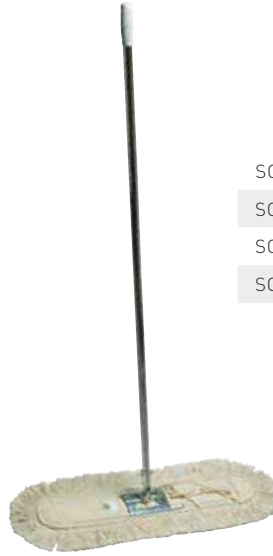

is to move back toward the entrance with "S" movements

It is recommended to use one gauze at a time, replacing it if necessary (depending on the amount of dirt, no more than 40/60 m²) and without lifting the tool during the sweeping operation.

WASHING & DISINFECTION

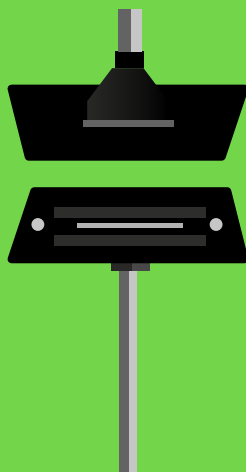

FOR
SURFACES MANUAL
WASHING OPERATIONS

both on floors and walls:

#01

PLASTIC FRAME
WITH FLAT MOP REPLACEMENT

#02

**ALUMINUM or
PLASTIC FRAME**
with
**VELCRO and
FLAT MOP REPLACEMENT**
(with velcro backing)

#03

**MOP HOLDER and
KENTUCKY MOP**

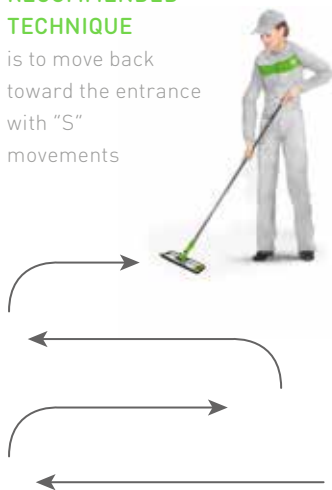

DURING WASHING,
THE FLAT MOP OR THE
KENTUCKY MOP ARE
RINSED FREQUENTLY
(the frequency depending
on the floor and type of
dirt) and wringed out
in the wringer.

**IN THE CASE OF DISINFECTION
or BACTERIAL CONTAMINATION
RISK, THE FLAT MOPS TO BE**
equipped with pockets or velcro
backing and must be replaced in
every room or after 20/25 m².

**WHEN DISINFECTANTS ARE
USED, MAKE SURE THAT THE
FLOOR REMAINS WET FOR A FEW
MINUTES (IN ANY CASE, FOLLOW
THE INSTRUCTIONS ON THE
PRODUCT LABEL).**

**THE
RECOMMENDED
TECHNIQUE**

is to move back
toward the entrance
with "S"
movements

DETAILS

- **CLEANS ANYWHERE:** reaches the most unreachable areas thanks to its sliding system "LOCK & UNLOCK"
- **INNOVATIVE:** joint blocking allows also a comfortable cleaning of vertical surfaces
- **ERGONOMIC:** the frame is made of aluminum, extremely light material and therefore particularly easy to handle. Additionally, the sliding joint allows to clean all those points otherwise requiring a physical strain.
- **MAXIMUM HYGIENE AND CLEANLINESS:** mops are removable by foot

WHAT IS MICROFIBER?

Microfiber is a very fine and strong synthetic fiber usually composed of two polymers - polyester and polyamide - joined together in a single thread.

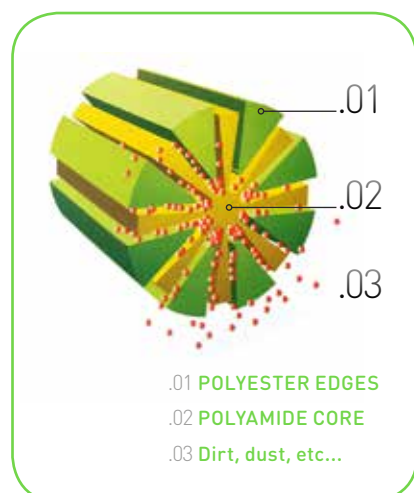

Polyester has an electrostatic effect that captures and retains dust, while polyamide has an absorptive power that, when combined with water, facilitates and allows the removal of dirt and the degreasing of any type of surface without leaving marks or stains.

The innovation of this thread is really in the fact that it is extremely fine - a characteristic that allows the fibers to penetrate the smallest of cracks in surfaces, resulting in an in-depth action and removing even smaller particles of dirt, dust, pollen and bacteria, making it the ideal material to be used in the healthcare sector or in areas with a bacterial cross contamination risk.

The fibers used in the mops are extremely fine - in fact, they weigh less than 1 gram per 9.000 m. of length, have a diameter of less than 1 denier* and are 100 times finer than a human hair.

Furthermore, each microfiber has some angular, wedge-shaped edges that create a sort of labyrinth enabling it to collect dust with a micro-abrasive action, which traps the dirt right up to the last speck, breaking it down into very minute particles that are retained inside the fibers itself.

The dimensions of the pores are very small (a few thousandths of a millimeter), hence the drops left on surfaces are minuscule and evaporate rapidly and the treated area dries very quickly.

* Denier is a unit of measure for the linear mass density of fibers. It is defined as the mass in grams per 9.000 meters.

MICROFIBER HOLDS 7 TIMES ITS WEIGHT IN LIQUID AND IT CAN BE USED FOR CLEAN, DRY AND POLISH EVERY SURFACES WITH EXCELLENT RESULTS.

BENEFITS

- Very strong cleaning power and **HIGHLY EFFECTIVE ON MICRO GRIME**
- **DRIES QUICKLY AND VERY ABSORBENT**
- **IT CAN BE USED ON ALL SURFACES**
- even those that are more delicate
- **SAVES TIME AND LABOR** (minimum 30%)
and consequently money
- **LONG LASTING**
(the mops can be washed even more than 250-300 times)
- **ECOLOGICAL**, allowing a saving on water and quantity of chemical product
- **ERGONOMICAL**, microfiber mops are lighter (in weight) than conventional mops
- **EXCELLENT QUALITY/PRICE RATIO**
- **WASHABLE AT 90-95° C**
(no softeners or additives).

LAUNDERING INSTRUCTIONS

WASH AT HIGH TEMPERATURE 200°F/95°C
if requested

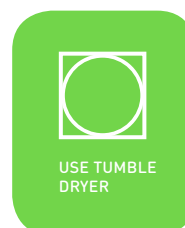

WASH WITH OTHER MICROFIBER PRODUCTS
for best results keep them separate from other textiles because the microfibers may pick up loose fibers.

DO NOT USE BLEACH AS IT MAY SHORTEN FIBERS LIFE

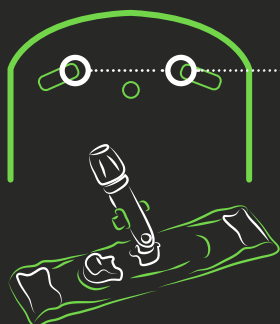

DO NOT USE FABRIC SOFTNER AS IT TENDS TO TAKE AWAY THE POSITIVE CHARGE. If, by mistake, fabric softner was used wash again with water only.

DO NOT USE CHLORINE

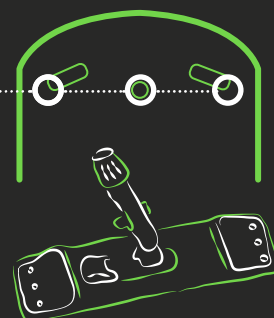

TUMBLE DRY IF NECESSARY
but if possible leave it dry naturally.

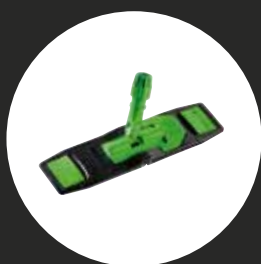

Flap with 2 HOLES

Flap with 3 HOLES

LOOP

The looped end yarn white microfiber allows to capture and holds more dirt inside its structure thus avoiding particulates dispersion. It can be used on all surfaces, wet and damp, and specifically in the pre-impregnated system.

WHAT IS TRIOMOP?

IPC designs and produces cleaning solutions based on the consumers real needs, solutions granting extraordinary results.

TRIOMOP, THE NEW PATENT MOP REPLACEMENT,

allows the user to perform three operations using just one mop which is divided into three sections.

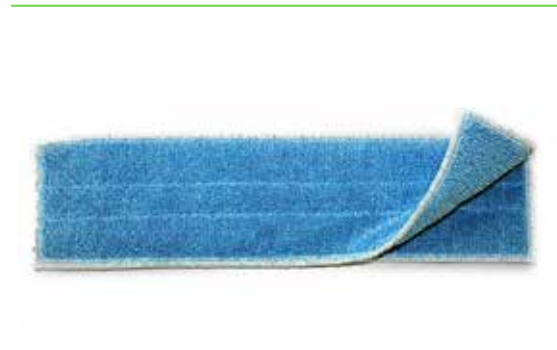

Extremely easy and economic, Triomop is made of 3 sides of different materials (microfibers or cotton) to meet different requirements and result levels.

By varying the materials of the mop replacement, i.e. microfiber and cottonpolyester (open-end or looped), the mop washes and dries "simultaneously".

BY USING
ONLY ONE MOP
YOU CAN COVER
THREE TIMES
THE SURFACE,
INCREASING ITS
VERSATILITY.

ADVANTAGES

- **EXCELLENT CLEANING RESULTS**
in removing both loose and attached dirt
- **VERY HIGH COVERAGE**
in terms of surface area (more than 40 m²)
- **UNIFORM DISTRIBUTION** of detergents
and reduced drying time
- **ERGONOMIC:**
lightweight for a smooth operation
- **UNIVERSAL:**
adaptable to all mop frames currently on the market
- **ENVIRONMENTALLY FRIENDLY:** an efficient mop
reduces detergent use with better results
- **EXCELLENT PRICE-QUALITY RATIO:**
essentially, 3 mops for the price of 2

TYPES AND MEASUREMENTS

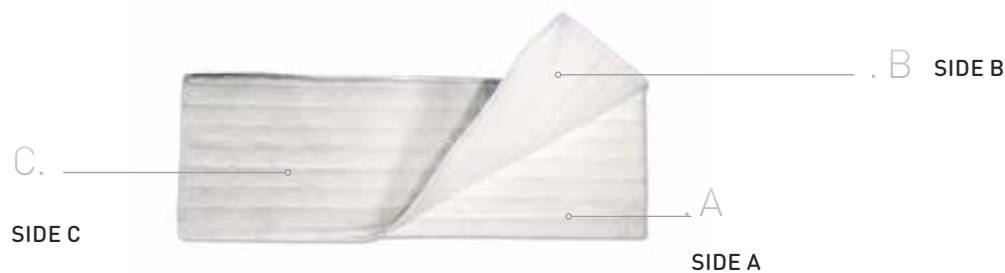

- WITH POCKETS (40x13 - 50x17 cm)
- WITH VELCRO (40x13 cm)

(Mops of any personalized size or measurements
ARE AVAILABLE UPON REQUEST)

Tested by:
FIGR Istituto di Ricerca e di Controllo per Facility Management GmbH

HOW TO USE TRIOMOP?

METHOD OF USE 1

(for normal cleaning operations)

PHASE 1

During the cleaning process, side A of the mop ensures a greater degree of contact between the mop and the surface to be cleaned, allowing a more effective collection of dirt. At the same time, part B (microfiber cloth) collects dirt residue while absorbing both the cleaning product and the excess of moisture.

PHASE 2

After folding back side B, the cleaning procedure continues by refinishing the surface using side C, leaving the floor perfectly dry and streak-free.

METHOD OF USE 2

(cleaning particularly dirty surfaces)

PHASE 1

Start with the mop in a folded position so that only side C is used. Proceed with cleaning until the entire surface to be cleaned has been covered.

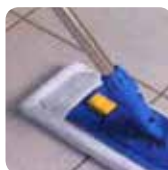

PHASE 2

Reposition the mop replacement by moving the handle upward, lift the frame and then push the mop to the floor so that both sides A and B are being used.

In addition to the cleaning performed by section A, part B (microfiber cloth) collects dirt residue while absorbing both the cleaning product and excess moisture.

Microfiber discs, when used with a single brush machine or scrubber, are particularly effective on all surfaces (including carpets and rugs) by combining the cleaning power of microfiber and spins of the machine.

The discs are manufactured with a very resistant fiber backing which facilitates anchoring to the machine.

Any size available on demand

CLOTHS & SPONGES

Created for the “cleaning professional team” and not only, the “cloths & sponges line” consists in a wide range of high quality and professional products, satisfying many and different customers’ needs.

CLOTHS

BENEFITS

- These cloths are **IDEAL FOR EVERY TYPE OF SURFACES SUCH AS FOR EXAMPLE REFLECTING OR ROUGH ONES;** moreover, thanks to a brief instructions sheet which describes the main features of each cloth, which is included in every package,
- IT WILL BE EASY FOR THE CUSTOMER TO CHOOSE THE RIGHT PRODUCT ACCORDING TO HIS OWN REQUIREMENTS.**

RANGE

The line of products has been split into 5 categories:

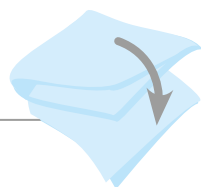

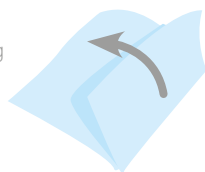

- MICROFIBRE**
- MULTI-PURPOSE**
- WINDOW**
- FLOOR**
- SPONGES**

METHOD OF USE

PHASE 1

Choose the color of the cloth according to the cleaning operation and area

Folding the cloth in 4 sections obtaining 8 damp surfaces in order to use the most of it

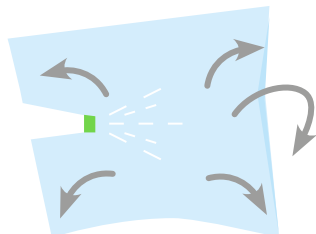

PHASE 2

Spray the solution on the cloth.

Humidify the entire surface of the cloth, both sides.

It is preferably spraying the solution directly on the cloth and not on the surface (unless there are special stains)

PHASE 3

Wipe the surface covering regular areas, holding the cloth flat, to avoid leaving strikes.

At the end, wash the clothes and put them to dry.

MICROFIBRE CLOTHS SHOULD BE WASHED IN THE WASHING MACHINE AT HIGH TEMPERATURE WITH THE APPROPRIATE CLEANER.

MICRO SILVER

Various preventative measures based primarily on cleaning and disinfection operations are put into effect in order to limit the risk of bacteria cross-contamination and the spreading of infection.

While these methods are effective in reducing risk, their effect is only temporary and the formation of colonies of bacteria remains a real threat. In this context, antimicrobial materials have recently been introduced - a real innovation in both the prevention and management of risk situations in areas with bacteria contamination risk.

WHAT IT IS

MICRO SILVER is a microfiber cloth treated with an antimicrobial material based upon silver ion nanotechnology, a method new to the cleaning sector, but with amazing potential.

HOW IT WORKS

The silver ions have a strong oxidizing power: they destroy bacteria and fungi by oxidizing the cellular membrane and inhibiting the development of pathogens, thus limiting the transfer of bacteria from one area to another.

This method guarantees the nearly complete destruction of all bacteria trapped within the cloth after 10 minutes. Its antibacterial qualities remain effective, even after 500 washes.

CHARACTERISTICS

COMPOSITION:
80% POLYESTER,
20% POLYAMIDE

WEIGHT:
308 GR/SQM

COLORS
BLUE, RED, YELLOW, GREEN

PACKAGING:
INDIVIDUALLY WRAPPED,
50 PIECES PER CARTON

BENEFITS

- **ECOLOGICAL:** eliminates 95% of germs/ bacteria, with great saving of chemical products
- **SAFE:** presents no danger to the user thanks to the harmlessness of silver; no risk of irritation or allergy upon contact with skin
- **EFFECTIVE: KILLS GERMS/BACTERIA IN 10 MINUTES**, thereby drastically reducing bacterial cross-contamination
- **PRICE: EXCELLENT PRICE-QUALITY RATIO;**
- **PRODUCT LIFE:** Bacterial treatment lasts up to 500 washes (at high temperature)
- **LONG LIFE OF CLOTH**

TEST

Effectiveness tests were conducted for the following pathogens:

BACTERIA

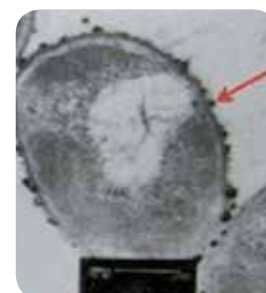

Test report 1: **STAPHYLOCOCCUS AUREUS**
Test report 2: **PSEUDOMONAS AERUGINOSA**
Test report 3: **KLEBSIELLA PNEUMONIA**
Test report 4: **ESCHERICHIA COLI**
Test report 5: **SALMONELLA**

FUNGI

Test report 6: **ASPERGILLUS FUMIGATUS**
Test report 7: **PENICILLIUM NIDULANS**

WASTE COLLECTION RANGE

LINEN

LINEN is a line of trolleys designed and built specifically for the collection of dirty linen which can be also used for waste collection.

LINEN is ideally suited in healthcare sector thanks to the Rilsan treated metal frame (or stainless steel on request) or in the hospitality industry and community.

The main characteristic is the modularity: each trolley, mounted on 4 rubber wheels Ø 80 mm. (nylon fork) and bumpers, is complete with a foot operated mechanism to open the lid for maximum hygiene and can be easily coupled to another equal with 2 screws, to form combinations suited to meet any collection need.

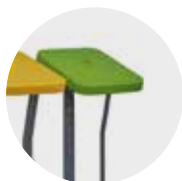

The cover, as the bag (capacity 70 lt., in plastic canvas or polyester for washing) resting on polypropylene plate for maximum stability, is available in different colors.

LINEN ASSEMBLY KIT

CODE
KTRI99670

ETA / BETA

ETA/BETA is the waste collection line entirely made of polypropylene with aluminum center support for maximum strength and durability, practical even for outdoor use or in areas with high humidity.

With a 120 lt. polypropylene bag support completed with fixing bag, pushing/towing fiberglass handle, 45 mm. aluminum support, Ø 175 mm. rubber wheels (polypropylene fork) and feet, ETA is used as a fixed container for collection; BETA is completed with Ø 80 mm. wheels to be used as a traditional trolley.

They are available in gray, blue or white (FOOD line) for food industry related companies. Even the lid is available in different colors (blue, red, yellow, green, gray and white) for differentiated garbage collection.

ETA/BETA is made with non-toxic, non-hazardous and **100% RECYCLABLE PLASTICS (POLYPROPYLENE, ALUMINUM, FIBERGLASS, NYLON).**

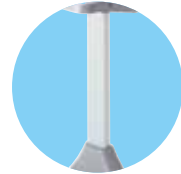

With this products, IPC is showing once again its commitment to the sustainability requirements and its commitment to follow the HACCP plans.

CLEANING TROLLEYS RANGE

MODULARITY SOLUTIONS FOR ALL NEEDS

Brix trolleys range is the ideal solution for all cleaning applications.

Black is Green trolleys combine the advantages of Brix modularity with the environmental benefits of recycled plastic.

CLEANING TROLLEYS RANGE /

MINI WASHING TROLLEYS RANGE

TROLLEYS WITH WRINGER

USING THE DOUBLE BUCKET FEATURES

avoids the dirty mop/fringe to be wringed into the clean solution bucket.

A variant of this trolley is the single bucket on wheels trolley. As the word, the single bucket on wheels is simply a bucket (of consistent thickness) on which the wheels are screwed directly on and where to put the wringer, without chassis.

Recently, the single bucket on wheels trolley has evolved into a double section for an effective separation of dirty water from clean one and often well equipped with a drain plug in order to easily empty the dirty water.

THE FREQUENCY OF THE CHANGE DEPENDS ON THE FLOOR SOILING.

The trolley with wringer is normally composed of the frame (in plastic or treated metal) with wheels and bumpers, pushing handle, 2 buckets (grey for the cleaning solution, red for the dirty recovery water) and a wringer (vertical with jaws, side press or roller type) inserted into the red bucket.

METHOD OF USE

PHASE 1

Fill the grey bucket with water up to 2/3, fill the red bucket with water up to 1/3; pour into the blue bucket the correct dose as recommended on the chemical label.

PHASE 2

Soak the mop into the blue bucket to absorb the solution.

PHASE 3

Introduce mop in the wringer and slightly wring it.

PHASE 4

Proceed with the cleaning operation on the floor with the mop, making sure it adheres well to the surface, walking backwards with "S" shape movements

PHASE 5

Soak the mop into the red bucket, to dilute the accumulated dirt.

PHASE 6

Wring the mop to eliminate as much as possible water and dirt, which will be deposited in the red bucket.

PHASE 7

Dip the mop into the blue bucket to absorb a sufficient amount of solution and repeat cleaning operations, starting from step 4.

CLEANING TROLLEYS RANGE /

BLACK IS GREEN™ RANGE

EXTREME MODULARITY FOR ALL NEEDS

**IPC
BRIX**

RECYCLED PLASTIC

> 75%
OF RECYCLED
PLASTIC

MAIN COMPETITOR

< 35%

"The declaration of recycling percentage (Polypropylene 20/25 Black) is a consistent consequence of transparent documentation of supply chain, quality processes, management requirements, quality structure and well organized supporting processes."

TÜV NORD CERT GMBH

INNOVATIONS

- Black is Green products uses **RECYCLED PLASTIC > 75%**
- **THE IPC MATERIALS TECHNOLOGY DOUBLES THE RECYCLABILITY INDEX** than traditional recycled materials in an environmentally responsible manner
- Ideal for public communities, industries and horeca

MAIN FEATURE

DETAILS

TROLLEYS

MODULARITY

Each Brix can be customized and adapted to meet the different user's needs. You can choose between 4 basic structures adding afterward different modules. In a few minutes you can configure your Brix!

- **NO BRIX IS THE SAME AS ANOTHER!**
Each Brix can be customised by different components, colors, logos, ecc.

- **BRIX IS A TRULY MODERN SOLUTION**
because it can be configured by the end user.

- **NO SPECIFIC SKILLS OR SPECIAL TOOLS** are required to assemble your Brix

BRIX TROLLEYS RANGE

WASHING TROLLEYS

DETAILS

- **HANDLY AND VERSATILE:**
Brix School comes with two 15 litre buckets and wringer
- **PRACTICAL AND COMPACT**
- **IDEAL FOR GENERAL CLEANING** of small and medium surfaces (schools, canteens, gyms and public areas)

IPC INFO

P.T. SYSTEM PRE-TREAT MOPS CLEANING SYSTEM

The IPC's PT (pre-treat) System is a cleaning and sanitisation system which revolutionizes the manual floor cleaning concept by using pre-treat looped end yarn microfibre mops.

With this cleaning system the mops are prepared at least 4 hours beforehand, by impregnating them with a solution of water and detergent making them ready to be used.

BENEFITS

- **REDUCES WORKING TIMES**
as the mops are ready to be used and the operator does not have to fill buckets, wring mops or dilute products during cleaning.
- **SPEEDS UP** any type of manual cleaning of floors etc.
- **EASY TO USE:** the operator has mops ready to be used and once he arrives on site with the service trolley he can start cleaning straight away using a mop for each room.
- **MOPS CAN BE REUSED UNTIL WORN:**
the pre-treat mops can be used even 7-10 days after preparation, as long as the bucket is sealed at the end of work; this means that they can **BE EASILY TRANSPORTED IN THE BUCKET FROM ONE SITE TO ANOTHER FOR SEVERAL DAYS.**

MOP PREPARATION

PHASE 1

Place the 20 microfibre mops to treat in the blue 22 lt. bucket, being sure the bucket is perfectly clean and odourless.

PHASE 2

Pour the water and detergent solution

Over the mops in the correct quantity.
For 20 mops, it is usually enough 1,5 lt. of solution.

PHASE 3

Close the 22 lt. bucket with the lid.

Turn the 22 lt. bucket containing the clean mops and the detergent solution upside down and leave the mop in the bucket for at least 4 hours.

IN THIS WAY ALL THE MOPS WILL BE IMPREGNATED BY OSMOSIS.

PACKS

HORECA MOP PACK

CODE
KTRI04958

Horeca Mop Pack is a complete set of tools for floors cleaning. Dam trolley, with large capacity can hold up to 30 liters. It is modern, functional and ecofriendly, designed to ensure stability.

The New Line / Strong wringer allows to wring the mop without effort and allows also you to choose the ideal level of humidity for your flooring.

Standard & Twisted Mops are effective against dirt. Their structures able to trap crumbs and hairs and to release them when in contact with water.

Finally, the new set of sponges are a completion for an effective removal of dirt and grease from tables surfaces and kitchens shelves even without the use of detergents.

HORECA PACK

CODE
KTRI04722

Pack Horeca is the right solution for those who prefer the effectiveness of a microfiber mop combined with a "flat system" floors cleaning.

Horeca Pack is equipped with a Dolly trolley and completed of a Speed wringer and two microfiber mops with an Olympic frame.

In the pack also an Hygiene microfiber is included, for a high removal power on porous floors on grouts, bleaching and aggressive detergents resistant. The Spot microfiber, is made to scratch the stubborn stains even from the most difficult soils.

To complete the pack, the new set of sponges for an effective dirt and grease removal from tables surfaces and kitchens shelves even without the use of detergent.

CLEANO SERIES

WINDOW & SURFACES INDOOR CLEANING

Lightweight, handy and easy to use, thanks its aluminum / polypropylene structure and its articulated joints system that allow you to easily reach even the most difficult points.

IMMEDIATE CLEANING WITHOUT EFFORT

INNOVATIONS

#01

**ERGONOMIC
HANDLE SHAPE**

EFFORTLESS

The ergonomic shape of the handle grants an easy grip maximizing performances and reducing efforts.

#02

**ARTICULATED
JOINT**

TO REACH THE TRICKIEST POINTS

The innovative robust and completely flexible swivel system enables the user to reach points that are normally difficult to clean, unless using ladders or rolling towers.

#03

**FILTER QUICK
RELEASE**

FILTER CLEANING HAS NEVER BEEN SO FAST

The filter quick release allows a fast and effective cleaning.

#04

**DETACHABLE
HEAD**

YOU CAN DECIDE WHICH FRAME TO USE

Hooking / release mechanism lets you choose the frame to be used for all applications.

GLASS MOP

IDEAL FOR

- GLASS
- MIRRORS
- STAINLESS STEEL

Ultra-microfiber pad for window cleaning. Combined with an alcohol-based chemical product, it cleans brightly with only one wipe, eliminates dust, fingerprints, grease and other light dirt. Thanks to the wide surface and compared to the traditional pads, Glass Mop covers a bigger area in shorter time with excellent results.

APPLICATION AREAS

**SNOW**

IDEAL FOR

- WHITE BOARDS
- MARBLE
- CANTEEN'S TABLE

White short pile microfiber with good sliding effect, suitable for wet/dump (washing) and dry (dusting) cleaning. The excellent fluidity ensures effective cleaning results in removing dirt on all types of surface.

APPLICATION AREAS

**SPOT**

IDEAL FOR

- BAR COUNTER
- INDUSTRIAL KITCHENS
- WHITE TILES

The combination of white short pile microfiber (suitable for any type of surface) and the black abrasive spots (to rub the stubborn stains) ensures an excellent result in removing even the most difficult soil.

APPLICATION AREAS

**ZEBRY**

IDEAL FOR

- PVC SURFACES
- PLEXIGLASS
- LAMINATE SURFACES

Zebry has a very special "V" structure that purposely interrupts the uniformity of the contact between the microfibres and the surface itself.

The spaces that are created allow the strand to penetrate deeper into the pores of the surfaces or into the grouts of tiles and to carry out a more careful and complete cleaning.

APPLICATION AREAS

BELT

- **IMPROVES OPERATOR'S COMFORT**

Thanks to its basic structure allows the transpiration and reduces moisture and sweat on the back while is worn.

- **PROTECTS THE WELL-BEING OF THE OPERATOR**

This type of belt distributes the weight on the sides of the operator rather than on the shoulders, significantly reducing the effort.

- **OPTIMIZES THE TIME**

Refine working time and improves productivity.

- **EASY TO USE**

A practical solution that optimizes the productivity of the window washing kit.

APPLICATIONS

Ideal for the cleaning of the areas where it is not possible to use the traditional cleaning kit:

- STATIONS
(train stations, metro,...)
- STAIRS
- CONFINED SPACES

SALES TERMS AND CONDITIONS

Purchase orders placed to IPC TOOLS S.p.A. are submitted to the ongoing sales terms and conditions, except otherwise agreed between the Parties in each specified contract.

1. IPC TOOLS PRODUCTS:

- a. All products manufactured by IPC TOOLS S.p.A. conform to safety and quality standards and are suitable for their proper use.
- b. Technical specifications, descriptions and pictures related to various products listed herein are purely indicative and IPC TOOLS S.p.A. reserves the right to amend such information in the case any change is considered necessary.
- c. Volumes and weights provided herein refer to standard single package quantities.

2. PRICES

- a. All prices herein do not include VAT and delivery terms are EX Works Villa del Conte (INCOTERMS 2000).
- b. The prices herein are valid unless otherwise specified.

3. PURCHASE ORDERS

- a. All purchase orders are "subject to approval by seller".
- b. Minimum amount per order accepted is € 500,00, VAT not included.
- c. All quantities in the purchase orders shall refer to the standard single packing.
- d. Each purchase order shall include product code and description.

4. PACKAGING

- a. Packaging is included in the list prices.
- b. For mop wringers packed separately from the trolley, an extra-charge of € 1,200 will be added.

5. PAYMENT:

- a. The Client undertakes to pay for the goods in accordance with the terms agreed with IPC TOOLS S.p.A. and indicated in the invoice.
- b. In case of expired and delayed payments the interest shall be calculated at the current rate.

6. TRANSPORT

- a. Transport duties are at Client's expense, unless otherwise agreed between the Parties.

7. DELIVERY TIMES

- a. Delivery times are not compulsory.
- b. A delay in delivery shall not be cause of any delay in payment or request for damages.

8. NON-COLLECTION OF GOODS

- a. Non-collection of the goods of Client's purchase orders within a period of thirty days from the date agreed, shall allow the seller to cancel the contract "ipso iure" and any payment received in advance shall be withheld by the seller, as penalty, except the case of an heavier loss.

9. SALES RETURNS

- a. All returns are subject to prior approval by IPC TOOLS S.p.A.
- b. Once the returns are authorised, they shall be returned free of damage and in the original packaging.
- c. All transport costs to return the goods are at the Client's expense.

10. IMPROPER USE OF PRODUCTS

- a. IPC TOOLS S.p.A. shall not be liable for any damage caused by or to the products due to improper or incorrect use of the products, non-compliance with the provided instructions, lack or inaccurate maintenance, tampering or alteration of the products.

11. CLAIMS

- a. Once the goods have been delivered at his premises, the Client shall check and inspect them: any remarks or comments related to damages or missing items shall be made at the moment of delivery to the carrier and mentioned on the delivery note.
- b. Any product defects shall be notified in writing to the seller (sent by fax or e-mail) within the times described by the law in force.
- c. Claims received verbally or on the phone shall not be considered as valid.
- d. No product may be returned without prior authorisation by IPC TOOLS S.p.A. (refer to clause Sales Returns)

12. APPLICABLE LAW AND COMPETENT COURT

- a. Any dispute or controversy arising from this contract or transactions hereunder shall be submitted to the sole jurisdiction of the Court of Padua, Italy.

13. PRICE LIST

- a. The price list hereby cancels all previous price lists.

14. ACCEPTANCE OF SALES TERMS AND CONDITIONS

- a. The Client expressly agrees to all the sales terms and conditions herein once he places a purchase order.
